 (+92) 311 5573218

Full-Stack Engineer building scalable web & mobile apps. Tech: MERN, React Native, .Net. Turning complex problems into sleek, high- performance solutions.

Education

Riphah International University, Islamabad

Bachelor in Software Engineering, cgpa: 3.76/4.0

Islamabad, Pakistan

2022 - 2026

Professional Experience

Techinn360

Software Engineer

Rawalpindi - On-Site

May 2026 – Present

[HpAppen](#)

- Contributing to **HPAppen**, a Swedish product built with Next.js and Node.js, contributing across frontend, backend, and APIs.
- Optimized APIs, **application performance**, and loading speed to improve overall product efficiency.
- Used Redux for scalable state management and integrated **Stripe** for secure payment processing.
- Implemented **product analytics** and tracking using PostHog and Mixpanel for data-driven improvements.

Stack: NextJS, React, NodeJS, MongoDB, Redux, Tailwind CSS, Socket.io, Stripe, Katex, Posthog, MixPanel, TypeScript, Cypress, Jest

Kodware

Associate Software Engineer

Rawalpindi - On-Site

July 2025 – April 2026

- Built responsive and modern React.js interfaces with Redux, focusing on smooth user experiences.
- Developed scalable backend APIs with strong validation, security, and **structured error handling**.
- Implemented secure **JWT authentication**, **claims-based access control**, and custom authorization policies.
- Developed **real-time** features and applied **Repository Pattern** & Clean Architecture principles.
- Delivered scalable features across multiple projects while adapting quickly to changing requirements.

Stack: C#, .Net9, Dapper, EF Core, SQL Server, React.js, Redux, WebSocket, JWT, REST APIs, TailwindCSS, TypeScript

Projects

StarRide | NodeJS, ExpressJS, TypeScript, React Native, TanStack, Expo, MongoDB, Tailwind CSS

StarRide is a modern mobile ride-sharing application designed to connect passengers and drivers seamlessly, offering fast, safe, and reliable transportation.

[FYP](#)

- Developed a **carpooling matching algorithm** for efficient route matching, seat allocation.
- Built **verified community** groups for universities and workplaces to enable trusted ride-sharing.
- Implemented **female-only** ride matching with verified drivers for enhanced passenger safety.
- Used React Context API and TanStack Query, **reducing API calls by 50%** and improving state management.
- Built an **Admin Panel** for driver and vehicle approval, streamlining verification and operations.

Chatty | C#, .Net 9, Dapper, WebSocket, SQL Server, React, JWT, TypeScript, Tailwind CSS

Built Chatty a real-time organization collaboration Web platform mirroring Slack’s functionality

- Built a scalable .NET backend with Dapper, SQL Server, and **Repository Pattern**.
- Developed **real-time messaging** and reactions using WebSockets with database synchronization.
- Built a modern React.js frontend with Vite, Tailwind CSS, Redux, Axios, and JWT authentication.

Street Scorer | NodeJS, React Native, Typescript, SQLite, Zustand, Expo, Tailwind CSS

Street Scorer is a user-friendly **mobile app** designed to make cricket scoring fast and effortless.

- Built a **real-time** cricket scoring app using React Native & Expo with live scores and player stats.
- Used Zustand for state management and SQLite for **offline match storage**.
- Added match history, player rankings, and data import/export features.
